

JetStream™

OASIS CAR WASH SYSTEMS

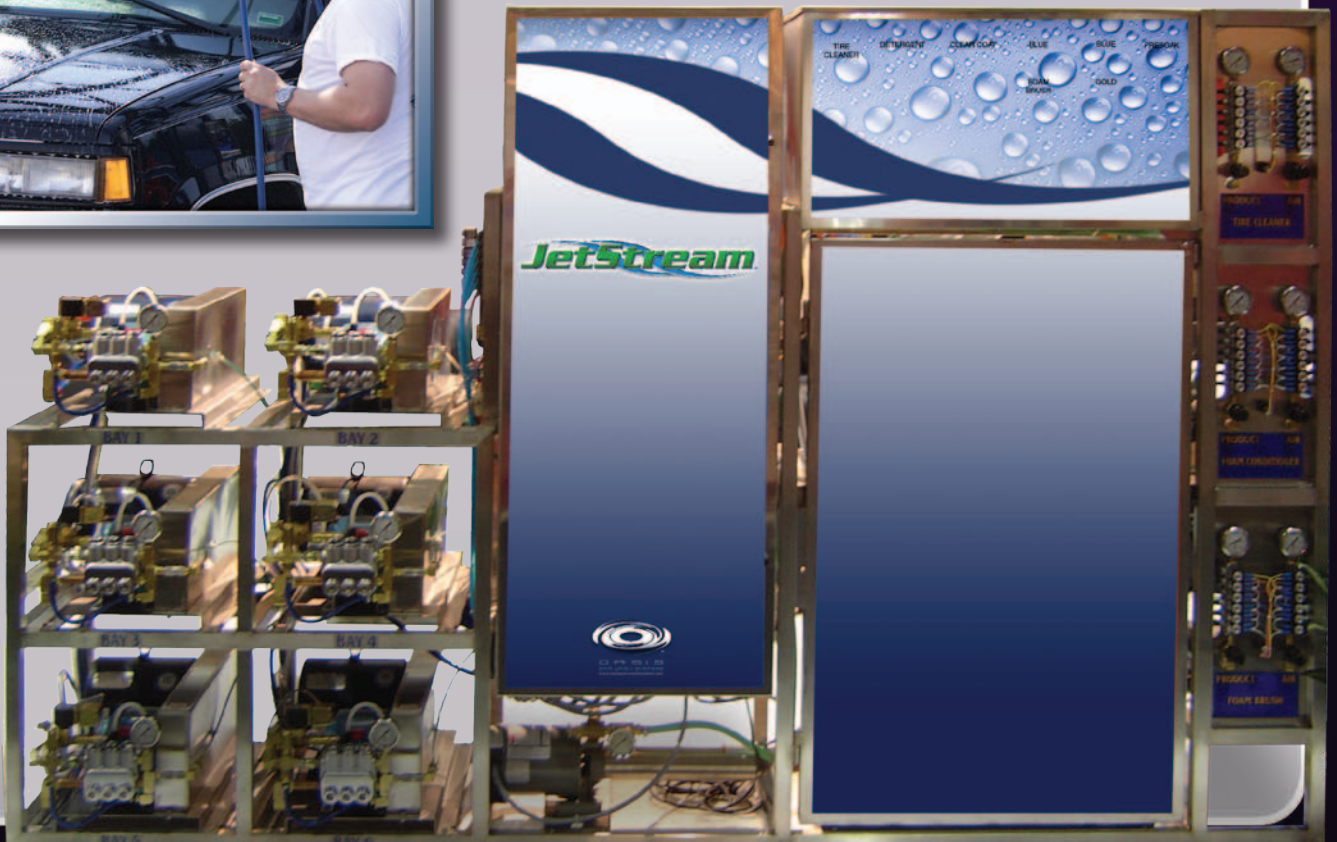

JetStream™

The Self-Serve System Designed with YOU in Mind!

At Oasis, we know how important your investment dollars are so we work diligently to ensure our products offer the latest technological advances while still maintaining structural integrity. It is this commitment to quality that has kept Oasis a leader in car wash manufacturing for over 40 years.

Our expertise in building automatic car wash systems is reflected in the quality of each piece of self-service equipment we produce and the **JetStream™** is no exception.

If you're looking for a quality car wash system with unlimited performance and income potential, then the **JetStream™** is the right system for you.

Small Space, Large Return

Space constraints shouldn't dictate what kind of system you purchase. Just because you don't have room for a large system doesn't mean you need to sacrifice quality or performance.

With its compact design and durable stainless steel construction, the JetStream™ is engineered to withstand the test of time thus allowing you to make the most of your investment.

It is also completely computer-controlled so there's no need for costly manual operation or adjustments which can actually shorten the life span of your equipment.

A "Worry-Free" Alternative

Another factor that sets us apart from the competition is our belief that your investment should start working for you as soon as possible. The JetStream™ system is totally self-contained and comes pre-plumbed and wired for trouble-free installation and setup.

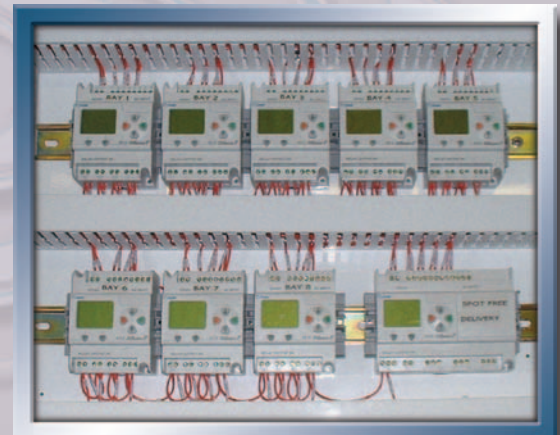

The design also allows for easy access to chemicals, which is an important feature during heavy wash times. A low-voltage control panel with circuit breaker protection eliminates the need to change fuses which can be dangerous and time-consuming.

You + JetStream™ = Profitability

These days, customers expect more from their car wash. They want to have a choice when it comes to cleaners, conditioners and rinses. The JetStream™ system is designed to give them those options. By offering more wash selections and features, you have the potential to increase your profitability and customer satisfaction at the same time.

***Push Button
Bay Meter***

Computer Controlled Bays

One of the most valuable features for you, the owner, is the in-bay marketing meter. This multi-function tool accepts bills and credit cards, has a voice module to give customers verbal commands, keeps track of wash times, and more. It also allows you to advertise your car wash for whatever promotion you desire, such as offering special pricing during off peak times to help generate income.

All Weather Operation

Our focus on your bottom line doesn't stop there. Our innovative freeze prevention technology allows your JetStream™ to operate in even the coldest of climates, thereby increasing your traffic and your profits.

STANDARD FEATURES

- Computer Controlled
- 3HP Motors
- Cat Pumps
- High & Low Pressure Gauges
- Stainless Steel Construction
- Totally Self Contained
- Removable Pump Assembly
- Brass Regulators
- Self Contained Chemical Tanks
- Pre-Wired & Plumbed
- Low Voltage Electric Panels
