

OASIS CAR WASH SYSTEMS

XP™

Here at Oasis Car Wash Systems, we manufacture dependable, high-speed, efficient car wash equipment with the investor in mind. Our products are made to be the best on the market. We don't take shortcuts, because there's no substitute for high quality.

SPEED

The Oasis XP is the second fastest touchfree in the industry today, second only to the Oasis Typhoon. It is able to wash more cars per hour by washing three sides of a vehicle simultaneously, compared to competitive models that wash only 1 1/2 sides at a time. Its unique design cuts down on wasted movement, thus increasing throughput.

CLEANING

Onboard Side Blasters enable the XP to concentrate cleaning on those extremely dirty areas of the vehicle. By being onboard, total control is maintained by the operator taking the customer out of the loop entirely.

Bumper Blasters allow the XP to focus its cleaning power on the front and rear bumpers and grill area to help remove grime and bugs.

Multiple chemical wands and underbody wash also aid in excellent chemical application, producing cleaner vehicles at minimal chemical costs. Zero degree nozzles increase water impact on the vehicle surface therefore aiding in the cleaning process.

INTELLIGENCE

Our onboard XPert monitors the entire system as well as the customer and keeps you informed of unusual events. XPert is not only your consultant in troubleshooting but in some cases is your service man.

XP features the industry exclusive Vehicle Avoidance System (V.A.S.). If XP comes in contact with any portion of the vehicle such as extended mirrors, trailer hitches, snowplows or any other after market add on, V.A.S. will make necessary length and width adjustments and continue the wash cycle.

PRECISION

The XP gear drive system has machine tool precision. There is no need to worry about low air or flat tires causing the machine to slip or skew. With the Oasis unique drive, every movement in the bay is exact.

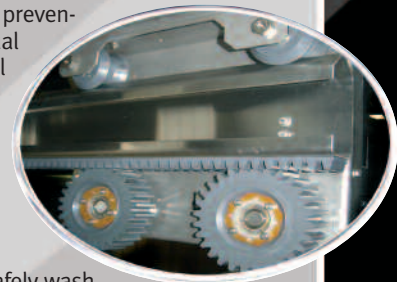

VERSATILITY

The XP is computer controlled giving you the versatility to adjust to the smallest cars or the longest pickups... even duallys. It also enables you to select the wash cycles just right for each location. The XP's unique winterization system allows it to run in the coldest climates.

- No doors required
- No weep water

RELIABILITY

Hydraulically powered, the XP drive system is so reliable we offer a 5 YEAR Warranty on the drive, a feature unmatched in the industry. The XP is designed to eliminate most preventive maintenance, with basic visual inspection of equipment being all that is necessary. Single Point Lubrication, or an optional auto lube system, is computer controlled and lubricates system as needed.

SAFETY

The XP program is designed to safely wash vehicles, protecting your customers' investment as well as yours. With the 360 degree breakaway wands, vehicle strike damage is eliminated. There are no shear pins and the system is easily reset by the operator.

CONSTRUCTION

The XP's stainless steel, wall-mounted frame helps protect the unit from damage as well as keeping the system elevated from normal grime experienced by floor-mounted machines. Providing an open, spacious bay, the XP is more visually appealing to customers. The innovations continue into the equipment room as well. The XP pumping plant is constructed of stainless steel and its flexible design allows for an integrated air compressor to save on space. The pumping system is completely enclosed to aid in lowering noise levels.

Triple Foam Shine System

Options

- **ESP** - Electronic Scanning and Positioning
- Triple Foam Shine System
- Two-Step Presoak
- Onboard Foamy Tire Cleaner
- Rust Inhibitor
- Bug Remover
- High Pressure Detergent
- Low Pressure Wax
- Drying Agent
- Heated Presoak
- Spot Free Rinse System
- Oasiswatch Communication Package
- Freeze Prevention Package
- In-Bay Pump Package
- Free Standing or Onboard Dryer
- Auto Cashier and POS Systems
- LED Instructional Sign Packages
 - Floor Mount
 - 92" Extended Height Version
 - Auto Lubrication

System Dimensions:

Bay Dimension:

Height - 12' (10' 6" min.)
Width - 15' 4" (13' 7" min.)
Length - 30' (29' 6.5" min.)

Maximum Vehicle Height:

84" standard
Optional - 92" extended height version

Required Utilities:

Electrical: 208/230 volt 3 phase
100 AMP service

Water Inlet: 1" @ 50 PSI inlet pressure

Compressed Air Requirements:

10 CFM @ 90 PSI
